I typically meet with clients before booking a wedding so I can hear all about you and get to know you before the wedding day. I like to blend in on the wedding day and for you to forget that I am there. The last thing most people want is someone else directing them on a day that they have planned for months. I encourage people to have a great time all day, its my job to capture it and (not direct it). Wedding items are normally available within 30 to 45 days after the ceremony.

Online viewing will be completed within one week..
